Two Countians Named To State FFA Offices At Convention At Penn State

UNIVERSITY PARK, Pa. — It was announced Friday morning that Dale Hershey of the Manheim Central FFA Chapter, and Donald Herr of the Lampeter-Strasburg Chapter had been elected to officer positions for the year 1965-66.

Hershey, the 18-year-old son of Bruce Hershey of Manheim R3, and a 1965 graduate of Manheim Central High School, was elected treasurer.

Herr was named sentinel. He is a 17-year-old member of the Lampeter-Strasburg FFA Chapter, and is the son of Mr. and Mrs. Harry G. Herr of 2125 S. View Drive, Lancaster.

The new state president is Dennis Grembline of Myerstown.

The boys are selected each year from among the officer

Area Dairymen To Meet Thurs. At Mount Joy

The Northeast Dairy Cooperative Federation will hold a special informational meeting for all area dairy farmers at 8 p.m. Thursday, June 24, in Hostetter's Banquet Hall, Mount Joy.

Recent important developments in the dairy industry will be discussed and a report given on Northeast Federation's new milk marketing program.

Abner H Risser, president of the Mount Joy Farmers Cooperative and a director of Northeast Federation, will

Area Feed Firms Plan Purchase Of Processing Plant

D. E. Horn & Company, York, and Miller & Bushong, Rohrerstown, announce the purchase of the Grimes Poultry Processing Corp, Fredericksburg, Pa. The purchase has been brought about by the acquisition of all outstanding shares of stock of the Grimes Company. Preliminary agreements have been executed and final settlement is scheduled within 90 days.

The history of Grimes Poultry Company dates back

N.J. First State To Adopt "Model Egg Law"

New Jersey is the first state to adopt the "model egg law" recently drafted by a national committee of agricultural officials and recommended by them as a pattern for egg marketing legislation in all the 50 states

The New Jersey bill, signed into law yesterday by Governor Richard J. Hughes, gives the State Board of Agriculture authority to establish grades, standards and

Ken Rutt and Gloria Hershey To Head The 4-H County Council

Delegates to the annual 4-H County Council convention, held this week in Lancaster at the Farm Credit Office, named Kenneth Rutt to succeed Larry Weaver as president of the council's agricultural unit. Rutt is the eighteen-year-old son of Mr. and Mrs. Amos Rutt of Quarryville R2, and was a delegate from the Kirkwood 4-H Community Club.

Miss Gloria Hershey was elected president of the home economics unit, succeeding Miss Virginia Wivell. She is the daughter of Mr. and Mrs. Parke Hershey of New Holland. Miss Hershey was a delegate from the Garden Spot 4-H Sewing Club, and is employed by the Mohr Fabrics Co

Other agricultural council officers elected were

Sue Mumma, vice president; Patricia Yunginger, secretary; Larry Weaver, treasurer, James Kettering, publicity; Eric Stoner, parliamentarian; Larry Antes, Dallas Wolgemuth and Richard Warfel, members-at-large.

Home economics officers elected

"Average" Farm In 1980 Will Gross $45,000

By 1980, there will be 1 million farms with average annual gross incomes of $45,000, according to R B Tootell, governor of the Farm Credit Administration. Three-fourths of these will be family farms, he predicts.

This estimate compares with only 1 million farms in

(Continued on Page 4)

PREPARING TO TAKE A SOIL PROFILE SAMPLE are Richard Hackenberger, left, Penn Manor Vo-Ag teacher, and Roger Pennock, agronomist from Penn State University. Pennock instructed the county teachers of agriculture this week in a one-day soil profile workshop. Above, he is shown cutting around the 4-foot long box with a knife while Hackenberger holds it in position. The next step in the process is to carefully cut away the soil around and in back of the box, tying each section to the box with cloth as they go. When finished, the box will contain a perfect profile of the soil to a depth of four feet. Other steps, and final analysis, are then made in the laboratory. The site where the above sample was taken was a new house foundation near Ronks. L. F. Photo

County Vo-ag Boys Take 31 Medals At FFA Week, More Than Half Are Gold

UNIVERSITY PARK, Pa. — Paced by the Penn Manor FFA Chapter, which dominated the poultry judging event, Lancaster County FFA boys captured a total of 31 awards at the two-day, Pennsylvania Future Farmers of America annual state convention here.

Better than half of the total wins were of the gold variety, and of these three were for first place. First place in poultry judging went to Earl Myer, 17-year-old son of Mr. and Mrs. Landis Myer of Lancaster R2. Earl is a member of the junior class at Penn Manor High School. Another first place, in land judging, went to Larry Groff, a 15-year-old freshman representing the Grassland FFA Chapter. Larry is the son of Mr. and Mrs. Samuel Groff of Blue Ball. The third top win was in dairy judging by Ken Hess, a 17-year-old senior from Lampeter-Strasburg High School. Ken is the son of Mr. and Mrs Elvin Hess, Jr, Strasburg R1.

In the gold medal distribution, Penn Manor led with six — four of these being in their traditionally strong suit, poultry judging They were followed by Grassland and Cloister Chapters, each with four gold medals. The other gold medal-winning chapters were Garden Spot with two, and Solanco with one.

Some of the boys who won gold medals also will win expense-paid trips to various events in their fields. Ken

Poultry Assn. To Hold Auction Of All Equipment

The Lancaster County Poultry Association plans to hold one more auction sale — not chickens this time, but all of the office and barbecue equipment owned by the association.

The Poultry Center has been sold, and the new owner is scheduled to take possession by July 1st, so everything has to go.

Preceding the sale, which will be held on Thursday, June 24 at 6 30 p.m, there will be a clean-up detail needed to ready the equipment — especially the barbecue grills — for sale. This will be held on Monday evening, June 21 at 6.30 p m,

(Continued on Page 7)

Weather Forecast

Temperatures for the five-day period, Saturday through Wednesday, are expected to average below normal. Normal high and low for the period would be 84 and 61 degrees. It will be on the cool side at the beginning of the period with a slight warming trend toward the end.

Precipitation will probably average no more than ¼ inch, and that will be toward the end of the period.

DITHANE® M-45 protects against profit-robbing blight

During the past two seasons DITHANE M-45 has become the preferred fungicide among progressive potato growers. The reasons for its country-wide leadership in potato blight control are very important to you: DITHANE M-45 is more potent than other fungicides against early or late blight fungi... It supplies superior control even during severe blight attacks . . . DITHANE M-45 sprays easily and spreads evenly, clings to the foliage and resists weathering by rain or irrigation . . . DITHANE M-45 also helps prevent late blight tuber infection to reduce storage problems. Protect your potato investment in '65 with the best available fungicide—DITHANE M-45.

From Where We Stand . . .

Farewell To An Era

For the Lancaster County Poultry Association one era will end with the coming of July this year, and a new one will begin. At that time the Poultry Center which has been the home of the association for so long will be turned over to its new owner.

Since the Poultry Association lost its chief source of income with the demise of the poultry auction last year, and could find no suitable substitute, there was little need for maintaining such elaborate facilities. It was therefore decided to sell the building It was also decided at that time to donate 75 percent of the net return from the sale to the Farm & Home Foundation Fund.

In recent years, active membership in the Lancaster County Poultry Association has dwindled to less than 100 members This strikes us as ridiculous in a county with nearly 3000 farmers deriving a portion of their income from poultry, and producing a total value in 1964 of nearly $27 million from the sale of eggs and meat Farmers so often complain, and rightfully so, that they are not adequately represented either politically or economically — and yet they have a trade organization right at their fingertips designed for the primary purpose of representing them and they don't support it! How do you figure it?

The county association is a long way from being dead, however. It has a hard core of dedicated, well-informed members who recognize the need for such an association and are willing to hang on until the rest of their neighbors, who depend on poultry for an income, wake up to the need for just such an organization to represent their shrinking numbers.

What can a county poultry association do for you? It can do pretty much whatever you want it to do, if you will support it. It can provide a rallying point for social, educational, and business activities, and is your immediate link with the state organization. Supporting the association doesn't just mean making a dues contribution of a couple of dollars each year. It means getting out to the meetings, and helping to get your neighbors out; it means working on committees if you are needed; it means helping to give the organization real goals and direction and then helping it to achieve that function Like the old phrase says — "you get out of something only what you put into it" Not enough of the poultrymen in the county have been putting any energy into the Poultry Association

In this new era upcoming the association has an opportunity to grow with your help. There are few successful large businesses that would consider operating without an effective trade organization to represent them — and let's face it, poultry farming is getting to be big business!

The association's board of directors is interested in hearing any ideas poultrymen might have right now on how the association can better serve the county's poultrymen. If you have any ideas, let them know.

Go Further For FATHER!

We heard this phrase used in a commercial this week in relation to shopping for Father's Day. Couldn't tell you what the product was attached to the slogan because we were immediately consumed with the idea of an appropriate editorial for this week — editors are kinda goofy like that, sometimes the simplest phrase or word will send them on a wild mental spree of editorializing.

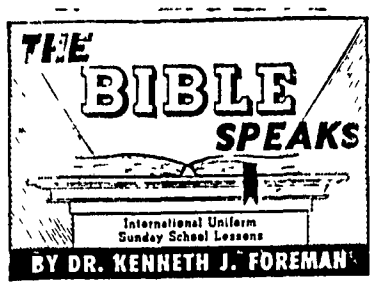
So these words on the care and feeding of Fathers are mainly for the youngsters. You know. Dad may seem like the Rock of Gibralter to you . strong, fearless, knows just what to do in emergencies . . especially when you're small and he looks like a mountain of security to you As you grow older, however, you begin to notice that he has his little weaknesses too. At that point you begin to appreciate him as a human being because you see that perhaps he is not perfect after all.

Aside from siring a family, protecting them and providing for them, a father has to discipline them when they need it, make many of their important decisions, and in his spare time — love them. So you see the old boy operates on a pretty high pressure schedule. And he could sure use all the help he can get.

He's not getting much help from the television commercials and so-called situation comedies. In these he's often portrayed as a bungling nincompoop who gets things so fouled up that it takes his wife the rest of the show to set the family's little world right.

So this Father's Day instead of just tossing Dad a card or a gift why not begin a year-long campaign of learning to understand him? That means perhaps getting a little closer to his problems, be a bit more tolerant of his moods, humor his whims instead of balking at every suggestion he makes. Simply stated, take some of the friction out of his daily life. Get to know the "old guy"; you may discover he's a pretty good egg after all!

In short, go further to help FATHER go farther! You'll not only help him to get more mileage out of life, you will find your mutual relationship far more enjoyable.



Beauty in Worship

Lesson for June 20, 1965

Background Scripture: I Kings 8; 1 through 9 14.
Devotional Readings: I Kings 8 1-2, 9-21.

IF YOU will stop to think about it, you can see why so many people plan and work to bring beauty into the public worship of God. A great deal of the finest in art has been wrought under the influence of religion. There

Dr. Foreman

are many places for beauty in connection with Christian faith. We here have time only for one area, the worship of almighty God. If religion stimulates the arts and needs them, conversely art stands in need of the inspiration which arts can give. Beauty and religion go hand in hand.

Fine Arts and Faith

What would a worship be without hymns? The congregation cannot join actively in the preaching, but in the hymns, hymn-time, each person has as much active part as choir or minister. How many persons have left a church service renewed in spirit by the hymns which were sung there? An ideal church will not only be clean from attic to cellar, it will be housed in a place where artists have been at work. Poetry, and everything beautiful in a church, such as lighting, the chancel and stained glass windows, speak to us of the eternal glory of God. Beauty, the gift of God can lead men to him. Once in the busy and wicked city of Milan there lived a rather wild young man. His mother feared she might never see him again. This young man had seldom been a churchgoer. He thought religion was for sissies. His mother had often talked religion with him, but in Milan he was attracted to a cathedral church of the great Bishop Ambrose. The services there were strikingly beautiful; and in time the young man was converted and he became a Bishop and wrote many books, many of which are still fresh. His mother had talked with him about religion, but Ambrose talked beauty and religion and it got under his skin, — and in Christ he became another man, one of the most influential for good and for God that Europe has ever seen. When this lover of all lovely things discovered that Christian life and faith are the loveliest of these, this marked the turning point, his conversion from darkness to light.

Two Dangers

But there are dangers in thinking of "art's sake," having some element in the worship which can hardly be called Christian "Beautiful isle of Somewhere" has a singable tune and soothing words: but it is not easy to read Christian meanings into it. Or again, some architects in planning a church sanctuary either forget or have never understood what it is they are building.

Is God In There?

It is well known that King Solomon was a great builder. Of course he called in foreign experts. This can scarcely be wrong. Christian churches have at times called in experts and architects from all over. Churches have been built looking like gingerbread castles. They have been dimmed with expensive but inefficient lighting. But after all, what is a church or chapel? Solomon called his great temple a house of prayer. Dr. Charles Leber told of seeing a little girl sitting on the stoop of a church which he was entering. "Mister," the child said, "is God in there?" (Dr. Leber afterward wrote a book with that title.) If that question cannot be answered in the affirmatuve, if God is not in there, it makes no difference whether you have the highest paid choir, the most eloquent preacher, the best equipped rumpus room and kitchen in town. If God is not there, beauty will do no good. If God is not there, then this congregation fits one of the best definitions of hell: being separated from God. Beauty and religion go hand in hand; but when beauty becomes an end in itself, a substitute for religion, the church takes a downward road.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Now Is The Time . . .

MAX SMITH

To Keep Alfalfa Sprayed

If the alfalfa weevil are feeding on the tops of second growth alfalfa, we know no other idea than to repeat the spray application of earlier cuttings Leaf hoppers will work on the second growth when 3 to 6 inches high, methoxychlor has always done a good job in keeping them under control

To Space Strawberries

New plantings of strawberries will be sending out runners from which new plants will take root These runners should be spaced so that a young plant starts every 6 to 8 inches, this will provide ample space for a strong plant and higher yields next spring The application of a nitrogen fertilizer now in June and again in early August will encourage new plants and stronger plants for next years production

To Mulch Garden Vegetables

There are many kinds of mulches that can be put over the ground during the heat of the summer to conserve moisture and control weeds Some of them such as peat moss, corn cobs, lawn clippings are very common Recent research work shows that black plastic strips put down between the rows of vegetables will prevent weed growth and hold the moisture.

Tomatoes seem to respond very well to the plastic mulch.

To Rotate Sheep Pastures

Good pasture can carry a flock of sheep during the summer months; however, a rotation system will allow time for new growth and help keep the stomach worm problem to a minimum. Several different fields are desired whereby each one can get from 2 to 3 weeks rest period between grazings. In addition the young lambs should be drenched every four to six weeks in order to eliminate stomach worms.

● N.J. First

(Continued from Page 1)

size-weights for eggs, modeled on standards developed by the United States Department of Agriculture, and provides for inspection procedures, licensing, labeling, quality maintenance and other items It repeals the State's 1934 Fresh Egg Law and 1953 Source Identification Law, which in some respects had become obsolete and difficult to enforce The new law becomes effective January 1, 1966.

The model egg law, after which the new New Jersey statute is patterned, was developed by a joint committee of the National Association of State Departments of Agriculture, the National Association of Marketing Officials, and the United States Department of Agriculture New Jersey Secretary of Agriculture Phillip Alampi, president of NASDA, was chairman, and J Clifton Lambert, Jr., chief, Bureau of Poultry Service, New Jersey Department of Agriculture, vice-chairman

Formation of the committee in 1962 followed considerable discussion on the need for uniformity in state laws governing the marketing of eggs that cross state lines Lack of consistency has hindered the free movement of eggs in both interstate and foreign commerce A model egg law, it was felt, would be a logical first step toward correcting some of these problem areas.

● "Average" Farm

(Continued from Page 1)

the U S today having annual gross incomes over $10,000 Tootell says that about 90 percent of all farm products in 1980 will come from the million farms rated in the $45,000-plus income range To be efficient units of production he feels the farms will have to be at least this big

Tootell predicts the family farm will continue to show remarkable capacity to adjust to the impact of new technology He feels they will continue to use the new techniques and will benefit by doing so, and in doing so they will become a firmly established segment of the nation's expanding economy.

There are an estimated 23 million 4 H alumni in the U S.

member of the National Honor Society, basketball captain and was elected to the School Board in the Youth Day in Government student elections.

Eugene's activities in the FFA included being the chapter Reporter his junior and senior year, receiving the Red Rose Degree, and a member of the local chapter basketball, volleyball and softball teams. He has actively participated in the annual judging contest held at the Lampeter Fair and was the top judge in 1964. He has shown some of his top market hogs at the County FFA Swine Show and has shown tobacco at local fairs, the County FFA show and at the Penna Farm Show in Harrisburg.

His farming program has consisted of raising top quality tobacco and feeding market-topping hogs. To date, he has fed over 300 head of hogs, as a part of his program.

The week of June 14 Eugene will be taking part in the annual FFA Week and State FFA Convention at Penn State, where he will represent his chapter in the dairy judging contest. He has been admitted to Penn State and will begin his advanced study this fall. He plans to study either in the field of Agricultural Education or Animal Industry and Nutrition.

Eugene is the ninth DeKalb Agricultural Award winner from Warwick and his name will be engraved on a special honors plaque provided by the sponsor. The plaque will remain in the Agriculture room.

Sixteenth century medicine relied heavily upon burning incense and swallowing strongly spiced medicines.

A clock that gains or loses one-hundredth second a day is not accurate enough for some scientific purposes.

Conservation District Directors Caution City Dam Planners About Siltation Condition In Conestoga

The Lancaster County Soil and Water Conservation District Directors expressed concern Monday night at their regular monthly meeting over the proposed dam on the Conestoga Creek Chairman Amos Funk formulated a statement to be delivered to the proper authorities

"While the Directors applaud the city's plan to build a second dam on the Conestoga Creek to store large quantities of water for use during dry periods, they view with misgivings the lack of apparent consideration being given to the chronic silting condition that exists in the creek now, and that will continue to exist until proper conservation measures are taken in the agricultural area above the proposed dam," Funk said

The Directors stated that less than 25 percent of the land involved is under adequate conservation Wayne Maresch, county conservationist estimated that silt-producing areas like those in the Conestoga watershed will pour from 4 to 20 tons of silt per acre per year into the creek Although federal funds are not involved in the proposed project, Maresch pointed out for comparative purposes that the federal government insists that any similar project receiving federal funds must be at least 75 percent covered by approved conservation plans before being eligible for funds.

The siltation condition in the Conestoga was reportedly the subject of a three-year study made by the U. S. Geological Survey. Funk reported that the results of that study are still being summarized and have not as yet been released. He suggested the city should be aware of those results before going on with the dam construction

The directors also made plans for the county plowing contest which will go to contour rather than level-land plowing this year for this first time The contest will be held at the Darlington Farm, located just north of Elm, on July 27 (rain date July 29) It is hoped that a field day can be combined with the plowing contest this year Co-chairmen for the twin event will be Aaron Stauffer, exhibits and field day; Elmer Good, plowing contest. It was suggested that demonstrations on wheeltrack planting, terracing, and other conservation methods would be of interest to attending farmers, and would help to further an understanding of the importance and application of conservation

A joint meeting is scheduled with the Lancaster County Planning Commission for July 19 so that the District Directors can get a better understanding of the long-range thinking of the Commission. This will be followed by another joint meeting on August 9 so the Directors can present their ideas to the Commission on the areas in the county that should be considered agricultural in any long-range plan.

Maresch, reporting on the conservation work accomplished by his staff during May, said that 21 landowners had actually applied practices during the month; 8 had completed basic plans for future conservation work; 2075 linear feet of diversion terraces had been installed; 4.2 acres of grass waterways had been constructed; 96 acres of strip cropping; 16,560 linear feet of cropland terraces; 1701 linear feet of tile — giving a total for May of 2171 acres that were adequately treated.

Maresch also reported that since last July 1st, 99 new plans had been inaugurated — this represented a 32 percent increase over the quota of 75 plans. He asked the Directors to approve cancellation of 174 out-dated plans.

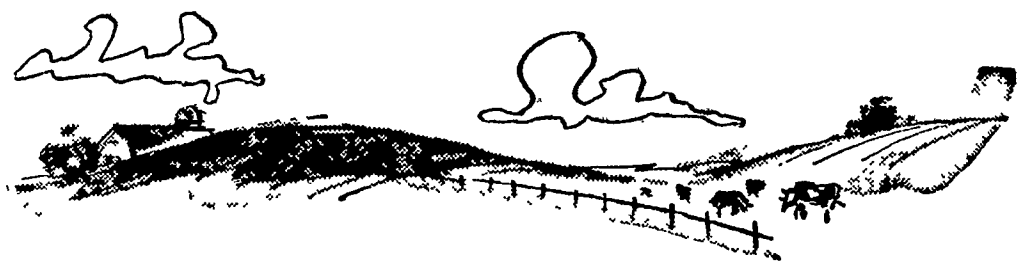
Some Thoughts For...

Dairy Farmers!



June is DAIRY month

June Is Dairy Month

- **Did you do all you could to help promote your industry in the past year?**
- **Do you talk milk to consumers?**
- **Do you explain its many nutritional advantages?**
- **Do you set the example when you take your family out for a meal and order milk as the beverage?**
- **Do you have the feeding program which gives you the best return per dollar spent?**

If you are in doubt about this last item talk to our Nutrition Department or our Dairy Specialist.

What else can we do to help you?

Just call

Local Bankers To Go To School At Bucknell

Seven Lancaster County bankers are registered to attend the Pennsylvania Bankers Association 1965 Trust Training School to be held Sunday through Friday, June 20-25, at Bucknell University, Lewisburg.

Approximately 175 bankers from throughout Pennsylvania are expected to attend the School which is being arranged by the PBA Trust Division.

Bankers from Lancaster County who are registered to attend the School include: Robert G. Nace, First National Bank & Trust Co., Elizabethtown; J. Carl Haldeman, The Conestoga National Bank of Lancaster; John H. Phillips, The Fulton National Bank of Lancaster; A. Bruce Hessinger and Lois G. Miller, Lancaster County Farmers National Bank, Lancaster; W. B. Hornberger, The Farmers National Bank of Lititz; and Martha M. Ebersole, Union National Mount Joy Bank.

This year's School, which is the third part of a three-year cycle, will be devoted to taxation, trust development and estate planning.

Verne C. Myrland, trust officer, and Lyman G. Sener, Jr., vice president and trust officer, both of The Fulton National Bank of Lancaster, will serve as members of the faculty for the School.

and all members and former members of the association are urged to turn out for one final get-together at the Center. As an added inducement, a hearty snack including a barbecue will be served by Charlie Texter — AFTER the work is done.

The board of directors urges all persons associated with the Poultry Center to turn out on Monday and renew old acquaintances and memories.

● County Vo-Ag

(Continued from Page 1)

Hess and Cliff Bollinger — Cliff came in second in dairy judging — will go to Waterloo, Iowa to the national dairy judging competition. Dan Erb and David Heisey will travel to the Eastern States Exposition at Springfield, Mass Earl Myer and Richard Thomas, who finished first and third in poultry judging, will go to the National FFA Convention at Kansas City For his second-place win in meat judging, Leroy Musser will also go to Kansas City.

These trips are financed through the state FFA association. A large part of the money comes from the registration fee paid by each person attending the state meet this week Each pays $15, and $11 of this goes for room and board— the balance goes to finance the boys' trips.

County judging winners were

Strawberry Season Is Here!

SPENCE

Strawberries and shortcake seem as thoroughly American as fried chicken and apple pie The large, luscious fruit we enjoy today is a far cry, however, from the small, sweet, wild varieties known to the early colonists of the eastern shores of the United States Each year strawberries seem to be bigger, more beautiful and better tasting. They not only taste good, but are an excellent source of vitamin C. One cup will give you more than the daily requirement They also supply small amounts of other vitamins and some minerals.

Look for fresh strawberries that are dry and glossy, solid red in color, free from white, green or hard tips, and free from moisture, dirt or decay spots. Strawberries without caps may be overripe. Size is no indication of flavor. Buy or pick berries as you are ready to use them. Fresh strawberries are very perishable and should be used within a day or two. Store them uncovered in the refrigerator, not in the crisper. Too much moisture in the air around the berries encourages mold. Wash the berries gently in cold water and remove the green caps when you are ready to use them.

Strawberries can be a boon to calories; one cup contains only 54 calories. However, by the time you add the sugar and whipped cream many recipes call for, the caloric count is terrifically high. You could add a non-caloric sweetener and low-calorie whipped topping in such recipes. For delicious, low-calorie strawberries-on-the-stem, dip washed berries by their stems into melted dietetic apricot preserves and then into confectioners' sugar.

Add your own distinctive touch to the traditional strawberry pie. For instance you might add ¼ teaspoon each cinnamon and nutmeg to the filling, or use a brazil nut crust. Use one cup sliced bananas in your next strawberry chiffon pie. Combine one cup each strawberries, crushed, drained pineapple and cut-up rhubarb with one cup sugar and three tablespoons cornstarch to make the filling for a delightful three-fruit pie. Glaze a custard pie with three cups crushed strawberries, one cup sugar and two tablespoons cornstarch. Bring the mixture to a boil over low heat, stirring constantly. Strain and cool; spread over custard pie.

Strawberries make an excellent filling and topping for cakes. Split a sponge cake in half, fill, put the layers together and then frost with a mixture of one cup sliced strawberries, one cup cubed, drained pineapple, 48 miniature marshmallows, ½ teaspoon vanilla and two cups heavy cream, whipped. Banana cake is delicious topped with strawberries and cream, flavored with one teaspoon rum extract.

Here is a delicious pound cake to serve with fresh fruits. It is especially good with strawberries.

SUMMER SPECIAL POUND CAKE

¾ cup (1½ sticks) butter
1½ cups sugar
½ teaspoon almond extract
½ teaspoon vanilla
3 eggs
2½ cups sifted cake flour
1½ teaspoons baking powder
½ teaspoon salt
½ cup milk

Butter and lightly flour 7-cup mold; set aside. In mixing bowl cream together butter and sugar; blend in almond extract and vanilla. Add eggs, one at a time, beating well after each addition. Sift together flour, baking powder and salt. Add alternately with milk, beginning and ending with dry ingredients. Pour into mold and bake in a preheated 325 degree oven 1 hour and 35-40 minutes Cool in mold 5 minutes before removing to wire rack. Serves 10-12 persons. Serve with sweetened fresh fruit.

Use strawberries in a salad also. Arrange a fruit platter with strawberries, quartered bananas, sliced apples, orange sections, grapes and melon balls. A dressing made from currant jelly beaten with mayonnaise, or from a mixture of ½ cup mayonnaise, two tablespoons honey and one cup heavy cream, whipped, is excellent with the fruit. Strawberries can also be used as a fruit dressing for molded salads or fruit salads. Combine ¼ cup crushed berries, ¼ cup pecans or almonds, chopped, two tablespoons orange juice and one cup mayonnaise.

Strawberries can also be used to make delicious drinks. Try this Strawberry-Pineapple Float for a refreshing summer drink.

STRAWBERRY-PINEAPPLE FLOAT

½ cup chopped strawberries
2 scoops pineapple sherbet
1 teaspoon sugar
Dash of salt
1½ cups milk
Scoops of pineapple sherbet (optional)

Using electric blender or mixer combine strawberries, pineapple sherbet, sugar and salt, beating until smooth. Gradually add milk and beat at low speed until blended. Top each serving with a small scoop of pineapple sherbet, if desired. Makes about 2½ cups.

● For The Farm Wife

(Continued from Page 8)

The peak strawberry season is all too short. Fortunately, strawberries are easily preserved. For home freezing choose firm, bright red berries, not over-ripe or bruised berries. Two quarts of fresh strawberries will make about three pints frozen. Strawberries can also be made into strawberry jam or combined with rhubarb or with pineapple in jam.

For a dessert that's got lots of eye appeal, you can't beat this unique Dessert Pizza. You can bake up the crust well ahead of time, and keep it ready for a special occasion or a time when friends drop in. The filling can be assembled in a jiffy; just spread on canned crushed pineapple and sprinkle over this, coconut, chopped pecans and a generous amount of fresh sliced strawberries. Then give it a glamorous glaze with melted strawberry jelly.

SEWING CLUB MEETS

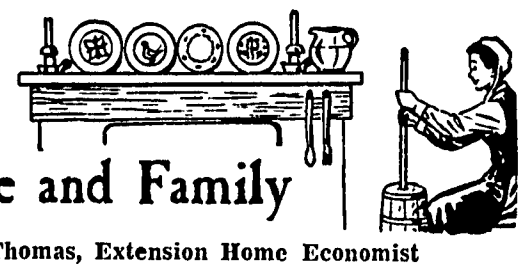
by Sue Mumma, reporter

The Landisville-Salunga 4-H June 14 in the Hempfield High Sewing Club met on Monday, School home economics room from 8:30 to 11.30 a.m. This will be the time and place for each of the weekly meetings during the summer.

Mary Ann Eshelman presided over the meeting, and game leaders Diane Kauffman and Chris Shepardson had a "get-acquainted" game.

Members were reminded of two dates — July 31 and August 18. The first for the horse show at Glick's Stables; the second, a county-wide clothing roundup at Penn Manor High School.

Members also worked on their sewing projects at this week's meeting.



For the Farm Wife and Family

By Doris Thomas, Extension Home Economist

Ladies, Have You Heard? . . .

THOMAS

Some Tips On Salad Preparation

When preparing a salad, wash and dry, then chill all greens. Do the same for fresh fruits and vegetables you plan to use Drain canned fruits and vegetables before chilling.

Cut chicken and meat into uniform bite-size pieces, and flake fish for easier eating

When using fresh peaches or bananas and apples, dip the slices in orange or lemon juice to prevent browning.

Tear lettuce and other salad greens instead of cutting and you'll prevent unnecessary wilting

Add salad dressing just before serving, and use only enough dressing to moisten the ingredients. The dressing should enhance the flavors of the salad ingredients, not mask them.

Practical Gifts for the Bride

If you're in doubt about a gift for the bride, why not consider something for her kitchen? A meat thermometer is one idea; another is an open, shallow roasting pan with a rack. The thermometer indicates when the meat is cooked to perfection and the open pan insures correct roasting procedure

For braising and for simmering the less tender cuts of meat, a Dutch oven with a tight-fitting cover serves a dual purpose.

A deep fryer-type skillet with a close-fitting lid can be used for braising, pan-broiling, and frying

Easier Housework During Summer

Rearrange furnishings to suit your family's summer

These represent the final effort, he said, to bring the files up-to-date, and leaves about 1700 agreements in the files, all of which are active.

Garland Gingerich, vocational agriculture teacher at Penn Manor High School and newly-elected District secretary, assumed his official duties at this week's meeting.

FULTON GRANGE BURNS MORTGAGE

Fulton Grange #66 held a mortgage-burning ceremony for their hall at Oakryn, Pa., Monday June 14. Approximately seventy-five people from Fulton, Colerain and New London Granges attended. Master, Gyles H. Brown opened the ceremony. Chaplain, Paul H. Uibel offered prayer.

Taking part in the ceremony were the assistant stewards, Chester Todd Jr. and Mrs. Stanley Stauffer Jr.; secretary, Mrs. Charles McSparran, and acting treasurer, Theodore Beck. Beck read the mortgage, then tore it in pieces and each member of the Grange burned a piece, signifying that each had a part in paying the debt. Richard VanNoy, Secretary of the Pennsylvania State Grange, was present and commended the membership on their accomplishments. Mrs. Stanley Stauffer Jr. presented a flute solo accompanied by Mrs. Adaline Edwards. Group singing concluded the program.

In observance of June as Dairy Month, the Home Economics Committee assisted by the men of the Grange made fifty quarts of homemade ice cream which was served as part of the refreshments.

During the business meeting, plans were made to take a one-day bus trip to the New York World's Fair, Saturday, July 31. The Committee arranging the trip consists of Clair Murphy and Charles McSparran, Quarryville, and Miss Dorothy Ackerman of Drumore Center. Persons interested in taking the trip may contact one of this committee. Reservations must be made before July 24.

The next meeting will be held June 28.

LAST TWO WEEKS
to get a $15 Trade-in Allowance on your old water heater regardless of its type or condition
and
PP&L's Money-back Guarantee of Satisfaction covering both operating cost and performance

TRADE UP TO GUARANTEED SATISFACTION

with a *flameless* electric water heater

HERE'S ALL YOU DO:

See your electric appliance dealer or plumber and take your choice of either a 40-gallon, or larger, quick-recovery water heater, or an 80-gallon, or larger, NEMA standard water heater. The dealer or plumber will then credit you with $15 toward the purchase price. (Most dealers and plumbers are participating in the plan. If yours is not, call your nearest PP&L office for the names of participating dealers and plumbers near you).

When the installation has been certified by the Company as being eligible for PP&L's low-cost water heating rate, PP&L will give you its Certificate of Guaranteed Satisfaction, covering both cost of operation and performance for six months after date of installation.

CONSIDER THESE MANY ADVANTAGES:

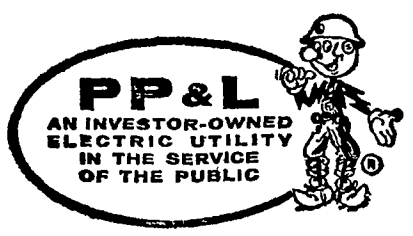
You'll prefer heating water the flameless electric way because it's *dependable* . . . *clean* . . . *automatic* . . . *safe* . . . *convenient* . . . *carefree* . . . *modern* . . . and, best of all, it's *economical* under PP&L's low, low rate of only one cent a kilowatt-hour.

And, what's more, because your new electric water heater is flameless and needs no flue, it can be placed anywhere—in a closet, under the counter, in the basement or in the garage.

Install an electric water heater now while you can get the $15 trade-in allowance and PP&L's Guarantee of Satisfaction, and assure yourself and your family of all the hot water you need, when you need it.

HURRY! This offer ends June 26

(Available only to PP&L customers.)



Feed Firms

(Continued from Page 1)

to 1931 when Charles F. Grimes began dressing chickens in a small plant in Fredericksburg. He was later joined by his brother, Walter H. Grimes. The present plant was built in 1947 on Route 22 just outside Fredericksburg and is equipped with the latest Gordon Johnson equipment. The plant employs 200 people. Presently there are four of Charles Grimes' sons active in the business. A. E. Bailey, a past president of Delmarva Poultry Industry, is sales manager. The plant has an annual capacity of 12 million broilers. No change in personnel or operational procedure is contemplated.

The two feed companies have been active in broiler production with both independent and contract growers for 20 years. These growers are within a 50 mile radius of Fredericksburg.

Vo-Ag Officers

(Continued from Page 1)

candidates, submitted by individual schools, by the FFA delegates with the help of the area advisors. One delegate represents each county.

Last year's state officers from the county included Ken Martin, president; Roy Slaymaker, vice-president; Harold Brubaker, secretary.

"Learning by doing" is the 4-H way.

Provide Extra Water For Stock In Hot Weather, Council Says

Livestock and poultry farmers are reminded by the Nutrition Council of the American Feed Manufacturers Association to keep plenty of fresh, clean water available for their herds and flocks during the hot summer months.

For example, a large dairy cow may drink in excess of 40 gallons of water a day . . . and, if she doesn't get it, her production goes down as does her feed efficiency.

For every fifty hogs in the finishing lot, provide at least 125 gallons of water each day.

For laying hens, the Council recommends providing a minimum of one round automatic or jet flow waterer, or its equivalent, for every 100 birds When trough-type automatic waterers are used, provide a minimum of 8 linear feet per 100 layers.

An animal or chicken can get by without food for several days, however they cannot live without water.

Have You Heard?

(Continued from Page 9)

schedule and you can ease your housework. . .

Consider what furniture groupings will be needed for recreation and relaxation, whether in the living room, family room, or outdoors.

Also think about where you will cook and where the family will dine.

You may need to rearrange sleeping accommodations for guests.

Shift furniture to provide easy access and leave the major traffic lanes open and direct to avoid unnecessary tracking.

You can eliminate unnecessary cleaning if you put away furnishings and accessories you won't be using during warm weather. And if you can provide outdoor living and dining areas, you could save some energy.

Earliest known contour map is a chart of the English Channel drawn in 1737.

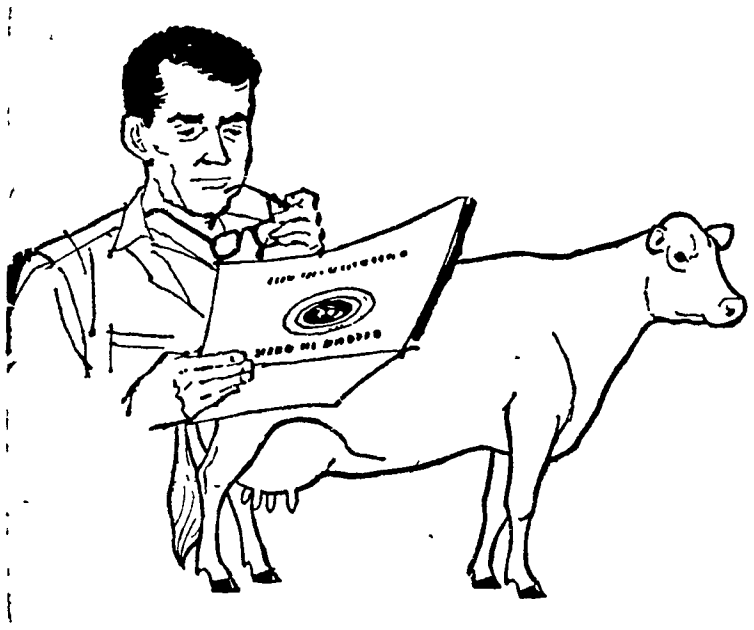
Business Man

MR. ~~DAIRYMAN~~:



HOW MUCH WOULD AN **EXTRA TON** OF MILK PER COW MEAN TO YOU?

Many dairymen who have challenged their herds — who have fed for more milk — have found that their cows can often produce as much as 2,000 extra pounds of milk per year when fed the PIONEER way.

If you're milking 100 head, an increase of 2,000 lbs. of milk per cow would mean 200,000 lbs. more milk per year for you to sell. At $4/cwt., the extra milk would bring an extra $8,000!

Management for profit the PIONEER way can mean big additional earnings for you. That's why thousands of successful dairymen rely on PIONEER feeds and feeding programs to help them milk out the total bred-in production capability of their cows — to help them get more profit from **each** cow.

Challenge your herd! Find out how good your cows really are Stop in soon and talk over your production problems with us Remember, there's a PIONEER feeding program to fit your need.

"Quench that stench"

STOP MANURE ODOR

with POWERFUL, NEW

ODORASE™ MANURE ODOR CONTROL

It takes only a few pennies worth of this powerful antioxidant-enzyme-bacterial conversion digestant to completely eliminate the rank odors caused by the decomposition of manure and other organic matter. ODORASE has been fully tested through research and is now being used with amazing success in the following areas where organic stench is a major economic problem: poultry houses . . . cattle feedlots . . . swine pens and lots . . . sheep in feedlots . . . manure piles . . . compost . . . septic tanks . . . sewers . . . garbage dumps . . . dead stock disposals . . . food processing wastes . . . pits and lagoons.

ODORASE is safe and economical to use It reaches its highest peak of efficiency in warm, moist weather when the oppressive stinky odors of decomposed organic matter are at their worst. However, ODORASE is effective in any kind of weather.

MONEY BACK GUARANTEE

Try a 10-pound order for only $17 50 plus postage Use as directed and if you are not absolutely satisfied with the trial results, your money will be refunded Offer good in U S only.

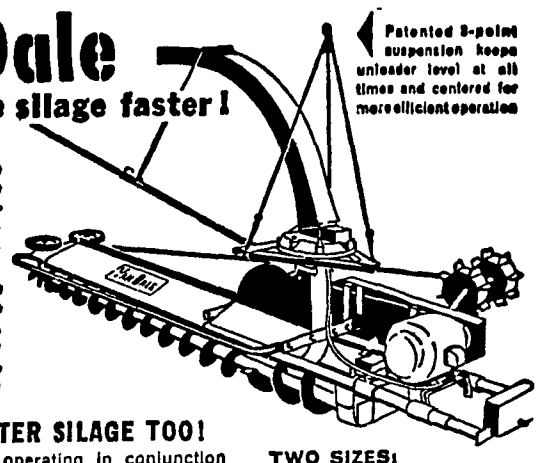
Get the BIG silo unloader value!

VanDale

Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:

Standard—for silos 10' to 16'

Heavy Duty—for silos 12' to 30'

R. D. 1, Myerstown, Pa.

Hearing Set To Amend N.Y., N.J. Fed Milk Order

The U S. Department of Agriculture will hold a public hearing in July to consider proposed amendments in cooperative association payment provisions of the New York-New Jersey Federal Milk Marketing Order.

Consumer and Marketing Service officials said the hearing will open in New York City, July 19th at 10 a m in the office of the Market Administrator. 205 East 42nd Street Additional sessions will be held in Syracuse starting July 26th.

Various petitions have been submitted to amend cooperative payment provisions of the Order, C&MS said, and hearing considerations will be limited to this issue.

The Order now provides for money to be paid out of the pool fund to cooperative associations, for performance of certain market-wide services to dairy farmers.

Among the proposals being brought before the hearing are proposed amendments which would

(1) eliminate the provisions paying cooperative associations out of the pool funds to perform market wide services and substitute new marketing service provisions. Money would then be deducted from payments to individual producers to provide market information and verification of weights and butterfat tests of producers' milk, with these services performed by the Market Administrator or qualified cooperatives,

(2) establish a market service research and educational foundation;

(3) revoke cooperative payment provision, with no substitute provision;

(4) modify present cooperative payment provision to require cooperatives to meet regularly under chairmanship of the Market Administrator to establish a coordinated program of market wide service to be undertaken by the cooperative;

(5) increase by one cent the rates of payment to cooperatives which operate marketing facilities receiving at least 25% of the milk of member producers;

(6) increase by one-half cent per hundredweight the amount deducted from the uniform price for the producer-settlement fund reserve, to provide for payment to producers by the Market Administrator of 80% of the amount due them from handlers who are delinquent in payments for milk received from such producers.

After considering evidence presented at the hearing session, USDA may recommend amending the order Producers, milk dealers and others would then be given opportunity to file exceptions. All exceptions would be considered by USDA before the final decision is issued and submitted to producers for ap-

DAIRY PRINCESS CANDIDATES

DONNA LANDIS, nineteen, lives at Creek Hill Road, Lancaster. She is the daughter of Lester G. Landis who has operated a dairy farm for 15 years, and presently has 26 milk cows.
